Profile

Senior Computer Engineering student at Boğaziçi University with a fascination for pattern recognition and prediction. I apply this tendency across domains, from training ML and LLM models to analyzing markets. I value process over outcomes, and learn from both success and failure.

Education

Boğaziçi University, B.Sc. in Computer Engineering

2021 – Present

Experience

Boğaziçi University – TRACE

June 2026 – Present

Research Assistant

Türkiye Real-time AI Catalog for Earthquake Monitoring & Early Warning — Kandilli Observatory, supported by Google.org

- Tracing earthquakes.

Pegasus

July 2025 – July 2026

Associate Data Scientist

- Contributed to flight route prediction modeling, supporting operational planning and forecasting.
- Active member of the AI Governance team, working on responsible-AI standards and oversight processes.
- Identified and integrated previously unused data sources into company analytics, expanding analytical coverage across business units.
- Engaged with external partners and vendors during technical evaluations and collaboration discussions.

Fimple

June – August 2024

AI Intern

- Built a local RAG-powered chatbot agent for developers using open-source models, prioritizing data privacy.
- Researched and partially developed natural-language-to-SQL models to enable non-technical banking staff to query data directly.

Doping Technology

June – August 2023

Software Engineering Intern

- Developed a REST API leveraging a pre-trained BERT model for customer issue classification.
- Contributed to Dopı AI, one of Türkiye's first large-scale chatbot agents, applying prompt engineering across open and closed-source models.
- Co-created No-Code App Development educational content.

Competitions & Achievements

- **AlgoRun Hackathon 2025**, 1st place.
- **Datathon AI 2024**, ITU AI Club, 1st place (1/91 in qualification, 1/30 in finals).
- **Trendyol Hackathon 2025**, 6th place out of 302 teams.
- **Teknofest T3 AI Hackathon 2024**, Final stage; built one of the largest, highest-quality synthetic Turkish LLM datasets (~1B tokens).

Certifications & Courses

Machine Learning Specialization, DeepLearning.AI · Supervised ML, Advanced Learning Algorithms, Unsupervised Learning, Recommenders, Reinforcement Learning

Deep Learning Specialization, DeepLearning.AI · Neural Networks and DL, Improving Deep NNs, Structuring ML Projects, CNNs, Sequence Models

Investment Management with Python and Machine Learning, EDHEC · Intro & Advanced Portfolio Construction with Python, Python and ML for Asset Management

Reinforcement Learning, University of Alberta (Coursera) · Fundamentals of RL, Sample-based Learning Methods

Graph Neural Network, Udemy · **5-Day Gen AI Intensive Course**, Kaggle & Google · **ANBEAN Finans ve Yatırım Okulu**

Events Attended

AWS Community Day Türkiye 2024 · Claude Code Meetup Istanbul · GitHub Enterprise & Copilot Day · On-site visits to TUSAŞ, BIST, TCMB

Languages English (Professional working proficiency) · Spanish (Beginner)
